🔗 Portfolio Website

Profile

Aspiring Full Stack Developer, Systems Administrator, and Cybersecurity Enthusiast with hands-on experience in software development, server environments, and web technologies. Passionate about AI, multimodal capabilities, and innovative tech solutions. Actively involved in tech communities, leadership roles, and collaborative projects. Seeking an entry-level or full-time position to apply and expand skills in software development, DevOps, or IT systems administration.

Education

B.Tech Honours in Information Technology

Harare Institute of Technology

08/2023 – present | Harare, Zimbabwe

Expected Graduation 2027 August

Professional Experience

IT Intern

Cimas Health Group

08/2025 – 07/2026 | Harare, Zimbabwe

- Collaborate effectively with team members in a structured, professional environment, demonstrating strong interpersonal and communication skills.
- Supported enterprise IT infrastructure, resolved network and system tickets, and assisted in managing daily operational workflows within a high-compliance health group environment.
- Maintain a high standard of accountability, adaptability, and attention to detail while managing assigned responsibilities.

Fuel Attendant

City Fuels

12/2024 – 02/2025 | Harare, Zimbabwe

- Delivered fast and accurate service handling fuel transactions.
- Strengthened communication, problem-solving, and customer service skills.
- Operated in a high-pressure environment, maintaining reliability and attention to detail.

Projects

Homelab Infrastructure & Self-Hosting

06/2026 – Present

- Configured and maintained a server environment (homelab.elic) using a Proxmox VE cluster.
- Deployed Nextcloud, Paperless-ngx, and Gitea using Docker and Docker Compose configurations.
- Integrated PostgreSQL and Redis for backend services, and implemented Authentik for centralized identity management.

Portfolio Website

Personal Project

02/2025 – present

- Built and deployed a personal portfolio website to showcase projects, skills, and professional background.
- Utilized GitHub Pages for deployment and version control with Git.
- Ensured responsive design for both desktop and mobile devices with clean UI/UX.
- **Tech Stack:** HTML, CSS, JavaScript, GitHub Pages

UniConnect

HIT 200 (Group Project)

08/2024 – 05/2025

- Developed a full-stack student platform for streamlining feedback process within a university environment
- Implemented features including role-based user authentication, database management, and a responsive user interface.
- Integrated Firebase for real-time data handling and authentication, and used Firestore as the NoSQL backend.
- Utilized Next.js and Tailwind CSS for building a fast, scalable, and responsive frontend with a clean UI.
- Applied Git for version control and team collaboration, ensuring smooth code management across multiple contributors.
- **Tech Stack:** Next.js, TypeScript, Firebase, Firestore, Tailwind CSS, Git

Organisations & Community

Google Developer Communities(GDG on campus HIT)

Member

08/2023 – present

- Actively participate in technical workshops and regional events, including DevFest and Build with AI Harare, to explore emerging technologies and network with industry peers.

Microsoft Learn Student Ambassador

Member

08/2023 – present

- Engage with Microsoft platforms and student community resources to expand technical skillsets and promote technology literacy on campus.

HIT ISACA

Member

02/2024 – present

- Participate in cybersecurity and IT governance discussions to strengthen foundational understanding of information systems auditing and security protocols.

UNESCO O3 Plus

Peer Educator and Entertainment Director O3plus HIT

02/2024 – present

- Communicate effectively with youths on campus to promote health, wellness, and positive social engagement.
- Organize and manage student-focused events, requiring strong logistical planning and crowd management.
